Professional Summary

Product Manager with 3+ years building AI-native and B2B SaaS products across logistics and fintech. Owned 0→1 product development at Kale Logistics — from problem definition and roadmap through engineering delivery and launch — deploying LLM and RAG-based systems that shipped to production. Earlier shaped product and analytics at Mindgate Solutions on UPI infrastructure handling 32M+ transactions per day.

Work Experience

Product Manager – Platform Team

Kale Logistics Solutions Pvt Ltd, Mumbai, IN

Nov 2024 – Present

- Owned the 0→1 build of the **Maritime Single Window (MSW)** – defined the problem space, scoped the roadmap, and drove engineering delivery from first principles to live product across **20 ports**, anchored by Malaysia's Port Klang corridor and expanding across Southeast Asia.
- Built an **AI compliance system** that checks shipping paperwork before it reaches customs – **21 agents** classify the goods, work out the duties, and screen every party against **85+ sanctions lists**. Filing went from the **1–2 days** brokers needed to **minutes**, and the **5–10% error rate** that sent paperwork back for rework now gets caught upfront.
- Scoped and launched **AI-powered document generation** (RAG & LLMs), cutting turnaround from 30 minutes to under 2 minutes (**93% reduction**), processing **~200 documents per day** across **20+ logistics document types** – eliminating the single largest source of manual effort for port operations teams.
- Defined and shipped an **AI support chatbot** (NLP) to handle tier-1 queries autonomously, reducing monthly support tickets from **250 to under 20** – a **92% reduction** – and freeing the operations team from reactive support overhead entirely.
- Prioritised and built an **AI-driven cargo forecasting and resource planning** system, giving warehouses advance visibility into demand spikes so congestion and SLA breaches could be prevented before they materialised, not managed after.
- Designed and launched an integrated **payment & invoicing module**, automating multi-party settlement workflows end-to-end and improving transaction transparency by **70%** across the platform.
- Established **product analytics** across Kale's platforms using **Mixpanel and SQL**, building feature adoption tracking and metrics frameworks that directly drove roadmap prioritisation decisions.

Product Analyst – UPI Product Team

Mindgate Solutions Pvt Ltd, Mumbai, IN

Jun 2023 – Aug 2024

- Drove requirements definition and stakeholder alignment for the **UPI 6.0 rollout at HDFC Bank**, coordinating across product, engineering, and client teams to deliver against **NPCI guidelines** on schedule.
- Defined a **competitive transaction analytics framework** comparing HDFC's UPI performance against peer banks, surfacing business and technical drivers that informed product and operational decisions at the executive level.
- Owned **high-volume reconciliation** across **32M+ data points per day** spanning **8 NPCI settlement cycles** – ensuring accuracy, auditability, and regulatory compliance at production scale.
- Identified and resolved **processing pipeline bottlenecks** (SQL and Kafka), reducing end-to-end processing time from **4+ hours to under 45 minutes (81% improvement)** and enabling near-real-time reconciliation at scale.

Education

Indian Institute of Technology, Bombay

Jun 2023

Biomedical Engineering

Skills

- AI & Technical:** RAG pipelines, LLMs (GPT-4, Claude), Prompt engineering, NLP-based product design, SQL, Python
- Product:** 0→1 product development, Roadmapping, PRD writing, User research, A/B testing, GTM strategy, Metrics & OKRs, Agile/Scrum, Stakeholder management
- Analytics & Business:** Mixpanel, Power BI, Qlik Sense, Google Analytics, Market research, Competitive analysis, Business case development
- Tools:** Jira, Azure DevOps, Figma, Notion, MS Excel
